

## **Curtiss-Wright Completes the Acquisition of Six Coating Application Facilities of E/M Engineered Coatings Solutions**

### **E/M Coatings 2002 Sales of \$26.0 Million; Expected To Be Accretive Within First Year**

ROSELAND, N.J., Apr 2, 2003 /PRNewswire-FirstCall via COMTEX/ -- Curtiss-Wright Corporation (NYSE: CW; CW.B) announced that it had completed the acquisition of selected assets of E/M Coatings Solutions ("E/M Coatings"), a Division of Morgan Chemical Products, Inc., and subsidiary of The Morgan Crucible Company plc, a \$1.5 billion British manufacturer of technology based materials and components, for \$16.7 million in cash.

With 2002 annual sales of \$26.0 million, the six E/M Coatings facilities are the leading provider in the United States of solid film lubricant coatings. E/M Coatings' application facilities have the capability of applying over 1,100 different coatings to impart lubrication, corrosion resistance, and certain cosmetic and dielectric properties to selected components. The coatings are used in a broad range of products and industries whenever conventional wet lubricants provide insufficient protection due to high temperatures, extreme loads, corrosion, wear, chemical corrosion or other adverse operating conditions. E/M Coatings serves a diverse customer base including the aerospace, automotive, electronics, industrial, medical, military and semi-conductor markets. In 2002, automotive (35% total sales), general industrial (26%) and aerospace (25%) markets generated the majority of the company's revenues.

E/M Coatings' six US coating application facilities have a total of 237,000 square feet and approximately 278 employees. They are located across the U.S. in Chicago IL; Detroit MI; Minneapolis MN; Hartford CT; and North Hollywood and Chatsworth, CA. Due to the nature of the business, the facilities have extensive equipment, procedures and programs in place to handle solid, water and air discharges in compliance with environmental regulations. The facilities also have key certifications including ISO 9000, ISO 9002, QS 9000, FAA and ATF.

Commenting on the acquisition, Martin Benante, Chairman and CEO of Curtiss-Wright, stated, "The closing of this acquisition advances the strategic objectives of our Metal Treatment business segment by diversifying our capabilities beyond the traditional shot-peening services. It provides a major opportunity to gain an immediate and significant foothold in the outsourced specialty coating service market segment with a large sales platform and multiple plant locations.

"This acquisition improves our leadership role in metallurgical based technologies in the United States, and is extremely complementary to our shot-peening and heat treating businesses."

Benante concluded, "This strategic acquisition, like our previous acquisitions, meets the financial criteria consistent with our business objectives, as it is projected to be accretive in the first year."

### **ABOUT CURTISS-WRIGHT**
